DETAILED ACTION

This action is in response to applicant's amendments and request for continued examination submitted 4 January 2007.

Claim Objections

1. Claim 12 is objected to because of the following informalities: said resilient lever arm has no antecedent basis. Also, if antecedent basis is, added claims 9-12 may be objected to as being substantial equivalents of claims 6-8. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1,2,6,9,13-18,23,25,32,33,37 and 39-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Walker et al (US 4,932,940).

 Regarding claims 1,2,9,13-18,23,25,32,33, and 39-43, Walker teaches a syringe assembly comprising a barrel (8), a needle cannula (40), a plunger (30) with stopper (distal end of 30) and thumb pad (proximal end of 30), a shield (6), an urging member (16), a lock lout track (32), an entry track (28), a pin (22), and a lock (34). See Figs 7-11 for the movement of the shield and pin.

Application/Control Number: 10/699,971

Art Unit: 3767

3. Claims 1,18,20,21,24,25,27,29, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by D'Alessio et al (US 5,389,085).

Page 3

Regarding claims 1,18,20,21,24,25,27,29, and 30, D'Alessio teaches a syringe assembly comprising a barrel (81), a needle cannula (55), a plunger (82) with stopper (distal end of 82) and thumb pad (proximal end of 82), a shield (60), an urging member (62), a lock lout track (25), an entry track (22), and a pin (21). D'Alessio shows dual track in Fig 6. It is disclosed that the syringe, barrel, and shield may be made of plastic. The barrel comprises a cylindrical portion (60) which defines the track arrangement (Fig 7) which may be formed unitarily with the barrel.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 6-12 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker in view of Berthier (US 5,429,612).

Walker discloses the syringe assembly as above. Walker does not disclose the blocking element comprising an inclined surface which the pin slides over. Berthier discloses a barrel 7, cannula 6, plunger 5, shield 8, urging member 20, pin 26 and one-way step 27. See Figures 1-3. Berthier also shows an entry track 23 and a lockout track 25/28.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the lockout track and resilient pin of Berthier with the sliding shield arrangement of Walker in order to provide a lockout track which prevents the syringe assembly from being reused and "avoid the accidental rotation of the sleeve to arm the device."

Claims 19,22,28, and 31 rejected under 35 U.S.C. 103(a) as being unpatentable 6. over D'Alessio et al (US 5,389,085).

Regarding claims 19,22,28, and 31 it is well known in the art to use glass as a material for a syringe barrel. It would have been within the skill of one of ordinary skill in the art to use glass as the material for the syringe barrel as a matter of obvious design choice.

Response to Arguments

Applicant's arguments with respect to claims 1-2, 6-25, 27-33, and 37-43 have 7. been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth R. MacNeill whose telephone number is (571)-272-9970. The examiner can normally be reached on 7:00-3:30pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Sirmons can be reached on (571)272-4965. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
